The Standard Barometer and Thermometer are read at 8 a.m., 10 a.m., 4 p.m., and 8 p.m., and the daily means are obtained by the application of hourly corrections, deduced from twenty years' observations. The station of the barometer is twenty-two feet above the level of the sea, and the receiver of the rain-gauge is two feet from the ground. The wind, rain and general weather registered are for the nearest wind day—four weighings to a mile.

The total quantity of rain collected were January 1st to 14.55 inches, the average for the same period being 15.45 inches.
